

BEAR GRYLLS ACTIVITY BOOKS

In the Wild

Wild Animals

Activity | Ages 8+ | Paperback | 8 ½ x 11 | 128 pp + 12pp stickers | \$14.99
 In the Wild ISBN: 978-1-68464-008-9 | Wild Animals ISBN: 978-1-68464-009-6

- Includes 180+ stickers.
- Lots of tips from Bear Grylls.
- Filled with fun, unusual facts.
- Packed with exciting activities: mazes, word searches, quizzes and more.

In the Wild: bind-up of *Animal Detectives*, *Extreme Animals*, *Polar Worlds*, *Reptiles and Amphibians*

Wild Animals: bind-up of *Dangerous Animals*, *Beastly Bugs*, *Wild Survival*, *In the Jungle*

HABITAT: POLAR REGIONS

The Arctic and the Antarctic are the Earth's icy extremes. The Arctic is the largely frozen ocean and land that surrounds the North Pole, and the Antarctic is the land around the South Pole. The animals in these places must cope with very long, cold, and dark winters. Even the summers are cool, and much of the ground and sea remains covered in ice.

1 This Arctic fox is lost in a snowstorm. She can hear her cub calling her, but she can't find them. Can you help?

2 Polar animals have to deal with extreme winters and summers. At the North Pole, the Sun rarely sets in the summer. In the winter, the Sun almost never rises. If there are 18 hours of sunlight in a day, how many hours of darkness will there be? What season would it be?

CLUE: There are 24 hours in a day.

The season would be _____ hours of darkness.

1 Match the polar animal to the correct clue.

1 Waurus 2 Penguin
3 Polar bear 4 Orca

2 Unscramble the names of these animals that live in polar places.

1 EASL	2 ENUPGIN
3 RCACTI XOF	4 APLRO EABR
5 CRAO	6 LRWUAS

BIG CATS

Lions, leopards, and tigers are known as "big cats." They are among the most dangerous predators on the planet. With their razor-sharp teeth, deadly claws, and awesome strength and speed, it's not uncommon for these mighty beasts to hunt down animals as large as elephants and rhinoceroses. Cheetahs are the world's fastest land mammals, and can reach speeds of up to 70 miles per hour. Tigers are the largest cats in the world, growing up to 10 feet long. And the majestic lion has the most powerful roar that can be heard up to 5 miles away.

1 Lions are the only big cats that live in groups, called prides. Tigers and leopards live and hunt alone. Unscramble the cat names and find the stickers.

LONI	RADLPEO	GITER
------	---------	-------

2 The dark spots on leopards are called "rosettes" because they look like the shape of a rose. This pattern keeps them hidden in different habitats. Spot the differences between these two leopards.

Tigers are omnivores, which means that they eat other animals. Tigers hunt other feline predators, including cougars, wild pigs, and sometimes even bears. Help the hungry tiger find its dinner.

BEAR SAYS
Lions can be dangerous if they feel threatened. Their natural instinct is to chase animals, so if they did attack you the worst thing would be to run away but it would be to stand still and make a lot of noise.

1 Design a crown for the lion.

2 Read the questions below and circle the correct answers.

1 How fast can cheetahs run? 50 mph 70 mph 75 mph	2 Leopards are larger than tigers. True False
3 A leopard's dark spots are called "rosettes." True False	4 Tigers only eat leaves, nuts, and berries. True False
